CHEMICAL INFORMATION

A blend of two advanced quaternary ammonium biocides plus a biocidal amphoteric surfactant to produce a broad spectrum of killing power on both gram+ve and gram-ve bacteria. Due to it's mixed biocide system the product also exhibits some fungicidal properties. Although rinsing food preparation areas after using the product is always recommended to reduce the potential of product build up independent reports have shown that in dilution's of greater than 1:10 rinsing is not required. Test results can be given on request

DANGER

Causes skin irritation. Causes serious eye damage. Very toxic to aquatic life with long lasting effects.

PERSONAL PROTECTION EQUIPMENT
